

Briefing sign off page continued - DELETE OR DUPLICATE THIS PAGE AS REQUIRED.

All additional sign off sheets must be attached to the main briefing pack.

The completed pack must be retained for 6 years with all unit training records and information.

By signing below, I confirm that I have been briefed on the following safety information including Fire & Emergency, Incident Reporting, Personal Hygiene and Safe Systems of Work relevant to my role for this venue. I understand it is my responsibility to follow instructions, to work safely and only to do work that I have been trained to do, that I am being trained on or being supervised whilst doing. I understand that I should talk to my manager or supervisor at any time if I am unsure of what to do or if I have any concerns.

HEALTH & SAFETY INFORMATION

Our Key Safety Behaviours ensure that we are all working to the same safety framework to build a safety culture that ensures that we all look out for each other.

BE MINDFUL - Always think first before you carry out a task or activity - are there any risks or hazards and is it safe to carry on.

GET INVOLVED – Help your colleagues if they need it or if you see them in trouble.

SPEAK OUT – If you are unsure of anything ask your manager/ supervisor or if you see any unsafe environments or working activities then let them know.

FIRE & EMERGENCY

Familiarise yourself with the location of fire alarms, fire escapes, firefighting equipment and assembly points.

Always follow instructions from your manager/supervisor or announcements on public address systems.

INCIDENTS

All incidents that result in injury, and all Near Misses must be reported.

Familiarise yourself with the location of first aid kits and first aid facilities.

MANUAL HANDLING

Only carry out manual handling tasks that are within your capabilities. Know your limits - if you need assistance, ask a colleague or your supervisor/manager. Manual handling aids, such as trolleys, sack trucks, keg barrow and roll cages should be used wherever available.

- Plan the route before you start
- Ensure that any manual handling aids are in good working order
- Assess the load – ask for help with heavy or awkward loads
- Start from a stable base – soft knees and balanced stance
- Avoid twisting or leaning
- Make sure you can see where you are going

LIFTING/CARRYING

- Bend your knees when lifting or lowering
- Keep your spine soft and your head up.
- Hug the load, keeping it close to your body

PUSHING/PULLING

- Ensure the equipment is in working order
- Push rather than pull where possible
- Keep your elbows close to your body

PERSONAL PROTECTIVE EQUIPMENT (PPE)

PPE such as goggles, gloves, safety shoes and high vis vests, is provided to minimise the exposure to hazards and reduce the risk of injury

- You must use/wear PPE where it has been provided. Some PPE, such as safety shoes, must be worn throughout your work day, other items, such as goggles must be worn for specific tasks
- Take care of PPE and store it safely when it is not being used
- Make sure that any PPE you have been provided with fits and that you know how to use it correctly
- Report and damaged or missing PPE to your manager/supervisor

WORKPLACE EQUIPMENT

- Only use equipment you have been trained to use and follow the instructions provided
- Always visually check equipment before you use it to make sure it is safe to use
- Report any damage, such as loose wheels or sharp edges, to your manager/supervisor
- Don't use damaged or faulty equipment and remove it from use or clearly label it 'do not use'
- Never attempt to carry out any repairs yourself

COSHH - WORKING WITH CHEMICALS

- Only use chemicals you have been trained to use.
- Follow all instructions on dilution, use and contact times - increasing the dilution of a chemical does not increase its effectiveness, but does increase the hazards and risk of chemical burn, skin irritation or other injury.
- Use the recommended PPE to avoid accidental contact with chemicals.
- Never mix chemicals or decant them into unlabelled containers or containers with other uses, such as a glass or cup.

PERSONAL HYGIENE

- Wash hands thoroughly after using the toilet, after handling chemicals or waste, after contact with patients and their environment, and before eating or drinking.
- Always eat and drink away from areas where chemicals are stored or being used, and from waste containers.
- Tell your supervisor, before commencing work, if you have any skin, nose, throat, bowel or stomach trouble or an infected wound.
- Your uniform should be clean and changed at least daily.

SLIPS TRIPS AND FALLS

- Spillages must be cleaned up immediately and wet floor signage displayed where appropriate.
- Keep walkways and work places clear of obstructions.
- Avoid running cables across pedestrian areas and always use the closest plug socket.
- Avoid rushing or running.
- Use the handrail when walking up or down stairs.
- Don't stand on furniture or other surfaces to reach, but use long-handled tools or a step stool.
- Report any damaged floor surfaces or poor lighting to your supervisor/manager.

ELECTRICAL SAFETY

Before use check portable electrical equipment for:

- damage to the cables and plug casing,
- bent plug pins and
- evidence of over heating, such as melted plastic or staining.

Don't.....

- use damaged or faulty equipment - remove it or label it clearly 'do not use' and report it to your manager/supervisor.
- use electrical equipment around water.
- overload or daisy chain extension leads.

CUTS & SHARPS

- Inspect equipment and surfaces for sharp edges or damage and report this to your manager.
- Always use a dustpan and brush/wiper to clear up broken glass and crockery.
- Dispose of broken glass and crockery in the designated bin or wrap it well with cardboard before placing it in the general waste bin.
- Concentrate when carrying out tasks in which you come into contact with sharps.
- Always be aware that rubbish may contain concealed sharps - never push down on a waste bag.
- NEVER pick up a sharp object with your hands, especially not a medical sharp.

VIOLENCE AT WORK

- If you feel threatened or intimidated at any time, or if you observe any aggressive or inappropriate behaviour, remove yourself from the situation as quickly as possible and raise the alarm.
- Report threats, intimidation, harassment or suspicious behaviour to your manager immediately and ensure you know how to raise the alarm.

SITE SPECIFIC SAFETY INFORMATION

This page provides the site specific information for this site.
Colleagues may take a photo of this page so that they can refer to the below information

BE MINDFUL - Always think first before you carry out a task or activity - are there any risks or hazards and is it safe to carry on.

GET INVOLVED – Help your colleagues if they need it or if you see them in trouble.

SPEAK OUT – If you are unsure of anything ask your manager/ supervisor or if you see any unsafe environments or working activities then let them know.

FIRE & EMERGENCY

Familiarise yourself with the location of fire alarms, fire escapes, firefighting equipment and assembly points. Always follow instructions from your manager/supervisor or announcements on public address systems.

The alarm sound is:

The assembly point is:

FIRST AID ARRANGEMENTS

Familiarise yourself with the location of first aid kits and first aid facilities.

First aid kit is located:

Our first aider is:
