

WHY CHOOSE DEVELOP TRAINING?

Training programmes can be delivered either at one of DTL's seven dedicated training centres or on site at client premises. DTL operates training centres in Bolton, Derby, Linlithgow, Lisburn, Romford, Swindon and York. All of DTL's training centres are purpose-built and set out to recreate real-life working environments. These provide learners with the opportunity to learn both the theoretical and practical aspects of their training within well-managed, structured environments.

DTL specialises in providing bespoke training courses and programmes but can also provide associated consultancy advice. This service helps to ensure that the training and development needs of learners can be assessed appropriately and employers can optimise their returns on investment.

DTL combines a broad training portfolio with comprehensive UK coverage. There are several other elements of DTL's offering which set it apart from other training providers:

Welcome

Feedback from learners is consistently very positive with regard to DTL's training centres. Learners enjoy both the welcome they receive and the overall training experience. They feel comfortable and well-supported and more than 99% of learners say they would recommend DTL to a friend or colleague.

Commitment

DTL is committed to supporting its clients and their employees achieve their collective and individual training goals. DTL's commercial and operational teams can help in this by assessing training, competency and compliance needs. This allows for recommendations to be made as to the most appropriate training solutions and, thereby, the returns on client training budgets to be maximised.

Expertise

DTL's history dates back over 50 years. This wealth of experience combines with contemporary industry knowledge and expertise to create and deliver outstanding, market-leading training courses. Rather than simply 'sheep-dipping' learners, by providing generic programmes, DTL embraces the latest methods of teaching to ensure that learning is not only relevant but is also tailored appropriately and therefore engaging. This ensures that messages are retained longer and to greater effect.

Hands on approach

The provision of practical, hands-on training significantly distinguishes DTL from most other training providers. Learners report that, whilst the equipment at other training providers may be appropriate, DTL stands out as in its ability to facilitate practical scenarios. This ensures that learners feel more confident and prepared to meet the various challenges they may face in the field.

Flexibility

DTL's training delivery teams can easily adapt to suit client requirements, providing solutions that genuinely add value to their businesses. DTL has a long-standing and proven ability to create truly bespoke training solutions. These allow its clients to select the best options for their needs. In addition, training courses are available through DTL's extensive open programme. In whatever form, training can be delivered either at one of DTL's dedicated training centres, onsite at client premises or, in some instances, within mobile units.

Recognised standards

DTL holds ISO 9001, OHSAS 18001 and Investors in People certification. Its centres are approved for the delivery of courses accredited by, amongst others, City & Guilds, ILM, CABWI and EEIAS. DTL is also listed on the Register of Apprenticeship Training Providers (RoATP).

BESPOKE COURSES

Although DTL offer an annual open course programme, the vast majority of our training takes place through the provision of bespoke courses. These courses can be delivered at either one of our seven dedicated centres or on site at client premises.

All our ACS Gas, Smart Metering, Leadership & Management and Apprenticeship training programmes are run as bespoke courses.

Visit our website to find out more about the full range of training offered by DTL

LEARNING & ASSESSMENT PORTAL

DTL's Learning & Assessment Portal (LAP) is redefining industry's approach to managing and administering workforce learning and development requirements.

“ Very informative - a good lecturer who made me feel relaxed and confident throughout the course. ”

“ The lecturer put everybody at ease and was very clear with their instructions throughout the course. I will be recommending DTL to the Highway Inspectors! ”

“ Impressed with the training facilities and the excellent lecturer whose ability to make you understand the subject is second to none - I would highly recommend. ”
