

## Step by Step Guide

Caution - HOT Food System – Please Handle with care

### Easy Steps – Jacket Potato

**STEP 1**

Ensure the microwave is plugged in. Look to check that the pack is in date and that the seal and valve are intact, and that the valve and label is positioned correctly.

**STEP 2**

Place the jacket potato in the microwave. DO NOT PUT THE PLATE INTO THE MICROWAVE.

**STEP 3**

Press the correct button according to the programme number on the label. Cook the jacket potato for the full programme time.

**STEP 4**

Leave for 15 seconds, then temperature probe the jacket potato. If above 82°C, record the temperature. If below, use the 30 second boost (Button 0). Temperature probe again. If still below 82°C dispose of meal and replace with new.

**STEP 5**

Take out of packaging and place on a suitable plate. Cut the jacket potato using a dinner knife and ease open (careful - the potato is hot).

**STEP 6**

Make a second cut across the first one, making a cross on the potato.

**STEP 7**

Add potato filling and side salad onto the plate if ordered.

**STEP 8**

Cover with a plate lid and serve.
