

**Key message ....** “Chartwells HSE Team are pleased to announce that we have secured an alternative Food Safety and H&S learning method – available to all our sectors if required.”

## Chartwells now have available “Classroom Training” sessions available in conjunction with L&D and Highfield International Ltd.

### Objective ....

To help sector Teams deliver and complete all Mandatory training in Food Safety and Health & Safety if relevant to role - where E Learning is not possible.

Both classroom training sessions are for all frontline colleagues relevant to role and equivalent to Level 2 – Renewable every 3 years.

### How ....

The E Learning for Food Safety and Health & Safety has been made into classroom sessions so all can now be fully trained in required areas.

Each Training session is split into modules equivalent to E Learning – Completed with nominated Teams in a classroom environment.

RM's to nominate sites/ teams required to attend and complete.

Trainees are then registered by the nominated Trainer with Highfield and L&D before training session,

Both subjects either Food Safety or Health & Safety are a **4 hour classroom session**, and there will be an exam at end to verify understanding of training completed.

Exam completed by trainees will be sent and processed by Highfield Assessors.

L&D updated at end of scoring to process on Compass My Learning as Fully Completed if applicable.

### Who ....

The Chartwells HSE Team have qualified Trainers available to complete these on request across most areas of the country – please contact your HSE Manager or our Auditor/Trainer [Susan.Smith@compass-group.co.uk](mailto:Susan.Smith@compass-group.co.uk) to arrange Classroom Training.

N.B. Suitable Location and Training room required.
